Dear Parent,
A student who has discovered the knowledge of learning has begun a lifetime adventure.

Sometimes the understanding of fundamental concepts alone does not help the students to crack the competitive exams as most of them are objective in structure. Students need rigorous training to familiarize themselves to the style of the exams they are attempting. The board exams which are of qualifying but not competitive in nature, do not completely address the needs of students in testing them in the objective type format.

To bridge this gap and to enable the students to face the reality of competitive exams, Brain Mapping Academy has brought out many titles.

Tested and trusted by teachers and parents alike these books, help students delight in the process of learning while building and strengthening their fundamental skills.

Care has been taken to design thought-provoking questions. The questions have been reviewed to fill the gaps in problem coverage and to build confidence in the students. They have also been expanded to impart reasoning/logical/analytical skills.

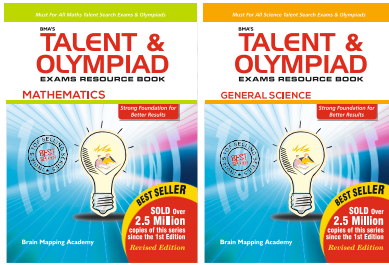

Our books also complements the additional preparation needs of the students for the regular board exams.

Begin the adventure with Brain Mapping Academy.

BMA Team

Talent & Olympiad Exams Resource Book (For Classes 1 to 10)

- Excellent source of important concepts and objective questions for **Mathematics and Science Olympiads / NTSE / NSTSE / Scholarship Tests and other International, National and State competitive examinations.**

RQ
REASONING
QUOTIENT
IS A MUST
PREPARE NOW

The process of learning depends on one's ability to think logically and reason quickly & effectively. These two factors are hence very crucial to one's progress in education.

Reasoning and logic skills form an integral part of a wide range of subjects such as Math, Science, Design and Technology, etc. These skills are also vital for use in our day to day lives.
