

01 Write the name of the organ system by reading its function.

1 The **respiratory** system breathes in air in order to stay alive.

2 The **digestive** system changes food into substances that our body can use.

3 The **skeletal** system gives shape and form to our body. It also protects the inner body parts.

4 The **nervous** system sends instructions to body parts telling what to do.

5 The **circulatory** system supplies blood to various organs of the body.

6 The **muscular** system helps us in movement.

02 Identify the internal and the external organs and name them in the correct boxes.

Heart

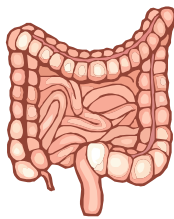

Nose

Brain

Eyes

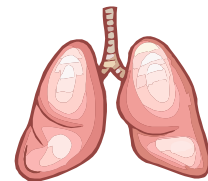

Intestine

Ear

Foot

Lungs

Hands

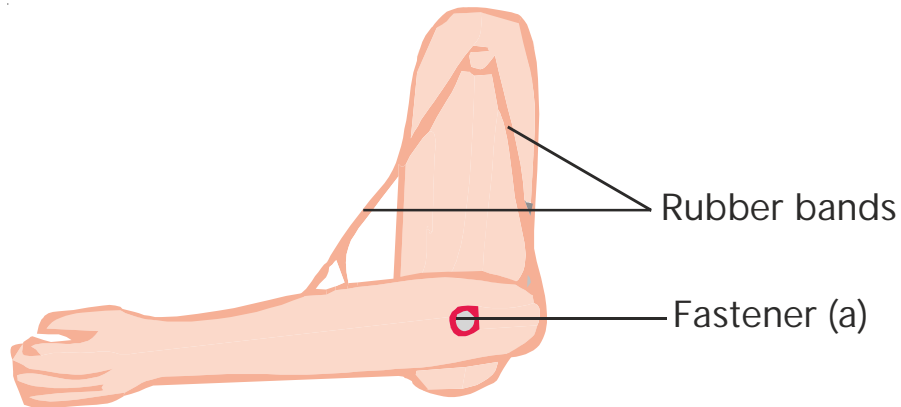

Stomach

Internal Organs	External Organs
Heart	Nose
Brain	Eyes
Intestine	Ear
Lungs	Foot
Stomach	Hands

03

1. Look at the diagram below carefully. Answer the given questions.

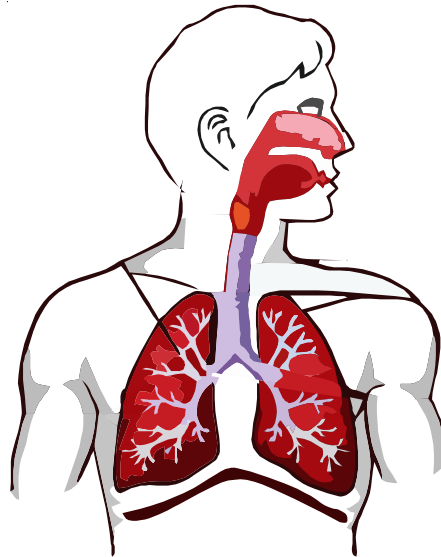

- (a) Which part of our body do the rubber bands represent ?
(b) What is the main job of this part of our body as stated in part(a) ?
2. Name two types of muscles.

1. (a) Muscles
(b) Joint
2. Smooth muscle
Straited muscle

04

Look at the diagram below carefully. Answer the given questions.

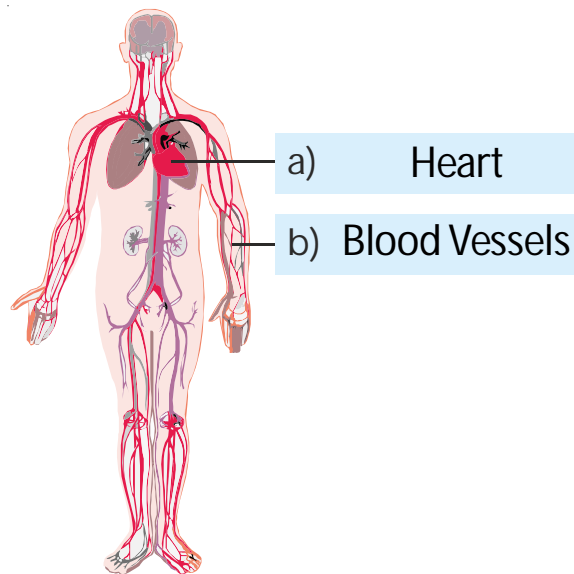

- (a) Identify the organ system shown.
- (b) Name two important processes that occur in the organs.
- (c) The organs help to remove two substances from the body. What are these organs ?

- (a) Respiratory System
- (b) (i) Taking in of oxygen
(ii) and giving out of carbondioxide
- (c) Lungs

05

The **Circulatory System** system carries blood to different parts of the body.

Write the names of the main organs of the circulatory system.

Name the following.

1. The organ that pumps blood to all parts of our body **Heart** .
2. Pipe like tubes which carry blood to all the body parts and back to the heart **Blood Vessels** .
3. Blood vessels that carry blood full of oxygen away from the heart to the body parts **Arteries** .
4. The Blood vessels that carry blood without oxygen to the heart from the various body parts **Veins** .
