

01

A person suffering from heat stroke has an unusually high body temperature. To prevent him from dying, immediate first aid would involve placing ice bags around his neck, under his armpits and between his groin area.

- (a) Why does a heat stroke sufferer have an unusually high body temperature ?
- (b) How does placing ice bags at the three areas mentioned above help to reduce his body temperature ?

- (a) Heat stroke occurs when thermoregulation is overwhelmed by a combination of heat, excessive environmental heat and insufficient or impaired heat loss.
- (b) Because large blood vessels lie close to the skin surface at arm pits, neck and in groin area. This will help quickly cooling down our body due to heat stroke.

|---|---|
| In case of gas leak in the kitchen, one should | <input type="checkbox"/> strike a match <input type="checkbox"/> operate on electrical switch <input checked="" type="checkbox"/> open all the doors and windows of the house |
| Which of the following should be used to put off an electrical fire ? | <input checked="" type="checkbox"/> sand <input type="checkbox"/> mud <input type="checkbox"/> water |
| If there is fire in the building, one should | <input type="checkbox"/> vacate the building immediately <input checked="" type="checkbox"/> go down the stair <input type="checkbox"/> never use the lift |
| Petrol is _____ than water. | <input type="checkbox"/> heavier <input checked="" type="checkbox"/> lighter <input type="checkbox"/> equal |
| For wounds, cuts, and scratches one should | <input type="checkbox"/> scratch it more <input type="checkbox"/> leave it uncovered and untidy <input checked="" type="checkbox"/> clean it with antiseptic lotion |
| For _____, apply ice on the head and pinch the bridge of the nose. | <input type="checkbox"/> snake bite <input type="checkbox"/> rabies <input checked="" type="checkbox"/> nose bleed <input type="checkbox"/> fracture |
| In case of a cut or a wound one should take _____ injection. | <input checked="" type="checkbox"/> anti-tetanus <input type="checkbox"/> hepatitis A <input type="checkbox"/> hepatitis B <input type="checkbox"/> polio |
| Bleeding from the nose happens for many people in summer only when _____ burst. | <input checked="" type="checkbox"/> capillaries <input type="checkbox"/> tissues <input type="checkbox"/> bones <input type="checkbox"/> cuts |

03

Complete the chart given below with the help of clues given below.

04 Identify the traffic symbols.

Right hand curve

Left hand curve

Speed breaker

Pedestrian crossing

School

Cycle crossing

No stopping

U turn prohibited

No entry

Speed limit

Pedestrian prohibited

Narrow road ahead

Narrow bridge

Steep ascent

Cycle prohibited

Stop

Horn prohibited

No parking

Hospital

Petrol pump

05

Give One Word.

Support given to the fractured area

Splint

Support made from cloth

Sling

Place where tissues around the joint get torn

Sprain

A tight bandage which can be tightened further by twisting a cross piece through it

Tourniquet

Breaking or cracking of a bone

Fracture

Walking on four feet close to the ground

Crawl

With fault

Defective

Strong chemical to kill Pests

Pesticide

Very bad, intense

Severe

The aid are treatment given to the injured before the arrival of a doctor

First-aid
