EXPLANATIONS

website : www.unifiedcouncil.com

04. (A) 49.4 05. (B) The time Naren family watched a movie at = 22:35 i.e., 10:35 pm Duration of the movie = 2 h 35 min 10:35 + 2 h 35 min = 12 h 70 min = 1 h 10 minTime taken to reach home = 2 h 10 min – 1 h 10 min = 1 hour 06. (C) $2\frac{5}{8} = \frac{21}{8} = 2.625$ 07. (B) Image A = 13 cubes Image B = 11 cubes i.e., to make both the images equal, need to remove 2 cubes from image A 08. (B) $6\% \times 400 = \frac{6}{100} \times 400 \times \frac{1}{10} \times 10$ $=\frac{6}{1000} \times 4000$ $= 0.006 \times 4000$ $=\frac{6}{1000} \times 4000$ $= 0.006 \times 4000$ 09. (B) Given length of a rectangle = 18 cm Length of a square = $18 \div 3 = 6$ cm Area of a square = $6 \times 6 = 36 \text{ cm}^2$ Area of the rectangle = $36 \times 5 = 180 \text{ cm}^2$ 10. (B) 11. (D) 48.015 = $40 + 8 + \frac{0}{10} + \frac{1}{100} + \frac{5}{1000}$ $= 40 + 8 + \frac{1}{100} + \frac{5}{1000}$

12. (A) Capacity of 1 packet of milk = 250 mlAmount of milk leaked from the packet every day = 5 mlNumber of days it take for the packet to be empty = 250 ml \div 5 ml = 50 days 13. (A) Amount paid by Farah for 3 books and 6 pencil boxes = ₹65.70 Cost of pencil box is ₹11.40 cheaper than a story book So, 3 story books = ₹11.40 × 3 = ₹34.20 = ₹65.70 - ₹34.20 = ₹31.5 Total items = 9 ⇒ ₹31.5 ÷ 9 = ₹3.5 So, cost of 1 pencil box = ₹3.5 Cost of 1 story book = ₹3.5 + ₹11.40 = ₹14.9 14. (A) Length of a ribbon required to make a bow = 15.7 cm Length of a ribbon required to wrap a present = 15.7 cm × 3 = 47.1 cm Length of a ribbon required altogether = 47.1 cm + 15.7 cm = 62.8 cm 15. (A) Sum of $\frac{3}{4}$ of 800 and $\frac{3}{4}$ of 100 $=\frac{3}{4}\times\frac{200}{800}+\frac{3}{4}\times\frac{25}{100}$ = 600 + 75 = 675 Rounding off each number of the nearest 16. (B) ten $13455 \rightarrow 13460$ $4567 \rightarrow 4570$ = 13460 - 4570 = 889017. Delete

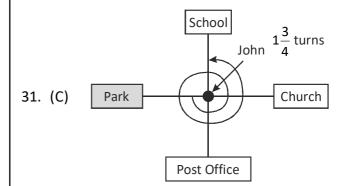

Number of brooms sold = $\frac{2}{2} \times 105 = 70$ 18. (B) 70 × ₹ 70 = 4900 ₹4900 was collected from the sale of the brooms Rope A : 12 pieces \rightarrow 2 m 19. (C) 1 piece $\rightarrow \frac{2}{12} = \frac{1}{6}$ m 4 pieces $\rightarrow \frac{1}{6} + \frac{1}{6} + \frac{1}{6} + \frac{1}{6} + \frac{1}{6} = \frac{4}{6} = \frac{2}{3}m$ Rope B : 8 pieces \rightarrow 16 m 1 piece \rightarrow 16 ÷ 8 = 2 m 2 pieces \rightarrow 2 × 2 = 4 m Total length = $\frac{2}{3}$ + 4 = 4 $\frac{2}{3}$ m Time = $\frac{\text{Distance}}{\text{Speed}} = \frac{90}{45} = 2 \text{ hours}$ 20. (B) 9.65, 8.298, 5.97, 0.23 is in descending 21. (B) order. 22. (A) Between 8 AM to 12 noon the rise in temperature is maximum 1 m = 100 cm 23. (D) 986 cm = 986 ÷ 100 = 9.86 m 24. (A) 1 cup = 175 gmIn 1 kg, 2 cups of sugar is added So, in 6 kg 12 cups of sugar will be added 12 × 175 = 2100 gm = 2.1 kg 25. (C) P = Intersection, Q = 2, R = Perpendicular 26. (C) Either 999 (or) Greatest 3-digit number If May 1st is a Tuesday, then the 7th, 14th, 27. (C) 21st and 28th would be Mondays (i.e., 4 Mondays). So, May 1st could not be a Tuesday 28. (B) 7 × 17 × 17 = 2023

29. (A) Cost price of goods = ₹900 + ₹225 = ₹1125 Selling price = ₹2000 Profit = S.P - C.P = ₹2000 - ₹1125 = ₹875 is her profit. 30. (A) Bucket P holds = 10 lBucket Q holds = 10 l - 3 l 460 ml= 10000 ml - 3460 ml = 654 ml

Bucket R = 6540 ml + 4 l 720 ml

= 6540 m*l* + 4720 m*l*

= 11260 m*l* = 11 *l* 260 m*l*

Mark $1\frac{3}{4}$ turns night or a $\frac{3}{4}$ turn to the left to get the 'before' position, which is the school

32. (B) Length of the garden = area \div breadth

= 333 ÷ 9

= 37 m

Perimeter of the garden = $2 \times (37 \div 9)$

= 92 m

A company charge ₹ 450 for 1 m $92m = ₹ 450 \times 92 = ₹ 41400$

33. (c)

REASONING

36. (D) 6, 7, 8, 9, 10 shapes are mirror images of 1, 2, 3, 4, 5 shapes respectively.

37. (C)
$$7 + 8 = 15$$
 $[\# = +]$
 $31 - 12 = 19$ $[@ = -]$
 $9 \times 4 = 36$ $[\& = \times]$
 $15 + 12 = 27$ $[\$ = +]$

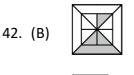

... # and \$ represents same mathematical operation.

40. (B) FORTY is spelled in alphabetical order.41. (B)

(0	0	L	0	U	R	F	U	L
#	ŧ	@	3	@	©	*	>	©	3

44. (B) Bindu's rank is 8^{th} from last means $30 - 8 + 1 = 23^{rd}$ from front Sindhu is 7 ranks ahead of Bindu $23 - 7 = 16^{th}$ rank

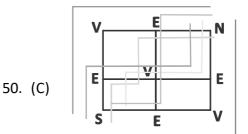

Sindhu's rank from start = 16th

CRITICAL THINKING

- 46. (A) From the given statement, we can say that there are some drinks which are not Coke. Clearly option (A) is correct.
- 47. (D) Rectangle is used in option(D) animal only.

- 48. (B) Three hens and a cow have $3 \times 2 + 4 = 10$ feet The number must be divisible by 10 i.e. 30 dog has 4 legs 30 + 4 = 34
- 49. (B) October has 31 days. Using information 2, numbers from 1 to 31 that when divided by 7 gives a remainder of 3 are 3, 10, 17, 24 and 31, and numbers from 1 to 31 that when divided by 5 gives a remainder of 1 are 1, 6, 11, 16, 21, 26 and 31. Only possible answer is 31. Hence, question can be answered using only information 2.

_____ The End =
