- 3.** Actual value of a digit.
- 7.** One of the symbols used to denote grouping (or) priority in the order of operations.
- 10.** If we divide zero by a number, the quotient is
- 11.** The sum of the predecessor of 701 and successor of 299.

1. The sixth place in the Indian system of numeration.
2. Result of division.
4. Number of match sticks used to represent 8 in Roman system.
5. The number that is divided by another number of a division operation.
6. The number that does not has a predecessor.
8. The numerals do not use the concept of place value.
9. The difference between the predecessor and successor of the greatest 5 digit number.
12. Numerals of same value are always.
